

Exterior Paint Guidelines

Current home color can continue to be used with approval from the DRC. However, moving forward only new palette color combinations listed may be used.

Only Sherwin Williams paint numbers can be used. Other paint brands may be used but they must be color matched to the listed Sherwin Williams number.

Palette choices, made up of body and trim colors, cannot be split or mixed between different palettes but must be used as the pair.

Example #1: Palette number #1 Griffin and Natural Tan can be used for either body or trim.

Example #2: Palette #1 Griffin cannot be matched with palette #9 Canvas Tan.

The majority of the new color palettes will go with all gray and all brown stone.

For maximum durability and aesthetics satin sheen paint is recommended.

Colors can be viewed in a pdf file on the website, however, it is recommended to get samples at a Sherwin Williams store.
